Heavy-Duty Time Release Technology (TRT™)
Lube Filters

Engineered to Help Reduce Maintenance Costs
Slowing the Degradation of Oil

An oil’s Total Base Number (TBN) – its acid-neutralizing reserve – degrades over time and miles, especially in modern diesel engines that use exhaust gas recirculation (EGR). The Total Acid Number (TAN) measures the acidity level of the oil. The specially formulated liquid additive in Luber-finer TRT™ filters is continuously metered into the oil supply, helping the oil maintain its quality longer.

New Luber-finer Time Release Technology (TRT™)

TRT™ filters are a breakthrough in oil management systems. Developed in the laboratory and perfected over more than a million fleet miles, Luber-finer TRT™ filters can help your fleet extend oil-change intervals by impeding oil degradation in modern diesel engines.*

Strict new emissions standards have been implemented to reduce soot and NOx levels in the air. However, design changes in emission-controlled, heavy-duty diesel engines have placed increased stress on engine oil. New Luber-finer TRT™ filters help maintain oil quality over the long haul. In fact, by helping to maintain oil quality, Luber-finer TRT™ filters are specifically engineered to help reduce escalating fleet-maintenance costs.

Controlled, Linear Additive Release

The Luber-finer TRT™ filter provides a controlled release of the highly concentrated liquid additive into the oil. To optimize the benefits of this additive package, the patent-pending release mechanism dispenses the additive in a linear manner, as shown in this chart, to help combat harmful acids that build up over the miles.

Slowing the Degradation of Oil

An oil’s Total Base Number (TBN) – its acid-neutralizing reserve – degrades over time and miles, especially in modern diesel engines that use exhaust gas recirculation (EGR). The Total Acid Number (TAN) measures the acidity level of the oil. The specially formulated liquid additive in Luber-finer TRT™ filters is continuously metered into the oil supply, helping the oil maintain its quality longer.
Impressive Mack T-12 Dyno Test Results

Mack T-12 is an industry-standard dynamometer test used to determine an oil’s ability to protect against engine wear in heavy-duty diesel engines that use EGR. Test results with the use of Luber-finer TRT™ filters show reduced top-ring and upper-rod-bearing weight loss. This reduced wear is directly attributed to the Luber-finer TRT™ filter’s ability to retain oil TBN longer, extending the oil’s useful life.

The Luber-finer Advantage

With Luber-finer TRT™ filters’ additive package, which is designed to increase protection against oil degradation, and following a regular regimen of oil analysis, fleets can maintain or even extend oil-drain intervals.* It all boils down to this: Luber-finer TRT™ filters can help your fleet reduce its maintenance costs.

* Any decision to extend oil drain intervals must be based on oil analysis and adherence to OEM criteria for acceptable oil operating properties. Operating properties may include, but are not limited to, TBN, soot, viscosity and fuel dilution.
Find Your Filter With Luber-Finder

Get quick access to Luber-finer filters and cross-reference information on competitive and Original Equipment Manufacturers’ products with Luber-finder.

Load the Luber-finder CD-ROM in your Windows-based computer and search the latest information. There’s an application section for automotive, light truck, heavy-duty truck and off-highway equipment.

For more information, or to get your quarterly updates of the Luber-finder CD-ROM, contact the Luber-finer sales department at 1-800-851-3641. You can also access Luber-finder basic at www.luberfiner.com on the Internet.

WARRANTY

Luber-finer filters are guaranteed to be free from defects in material and workmanship. In the event of an engine or equipment failure directly caused by a proven defective Luber-finer filter, which was properly installed and changed following the engine or equipment manufacturer’s recommended service intervals, Luber-finer will restore the engine or equipment to a condition equivalent to that existing just before the failure. Claims for engine or equipment repairs provided under this warranty must be submitted within 30 days after discovery of damage. Luber-finer Technical Services Department reserves the right to examine the engine or equipment and filter to determine the amount of damage and whether it was caused by a defective Luber-finer filter. This warranty gives you specific legal rights. You may have other rights which vary from state to state. Engine and equipment manufacturer’s warranties remain in effect when Luber-finer filters are used.
