LUBER  **FINER**

Luber-finer - U.S.A. Hotline: 800-882-0890 • www.luberfiner.com

WHAT MAKES **PRECISION-PLEAT** TECHNOLOGY BETTER?

American-made manufacturing equipment, filtration media and a hybrid adhesive – all specifically designed for Finer-Flow filters – combine to create Luber-finer's new pleating technology.

100% machine-controlled manufacturing ensures consistent product quality

Custom-formulated adhesive beads create precise, even separation between each pleat for maximum dirt-holding capacity

OUTSTANDING COVERAGE FOR THE MOST POPULAR ON-ROAD APPLICATIONS

BUILT TO DO MORE

From our American manufacturing and distribution facilities, Luber-finer makes a worldwide impact on the heavy-duty industry by sticking to two basic principles: Deliver a level of customer service that reflects our company values, and make continuous advancements in filtration technology.

Finer-Flow is our latest example of the second principle. By providing more protection from contaminants in critical areas and solving more filtration challenges with engineering innovations, Luber-finer is dedicated to keeping your fleet moving. That's why we're one of the world's most trusted filter brands.

FIND YOUR FILTER WITH OUR DIGITAL RESOURCES

Visit luberfiner.com or download our mobile app to get quick access to the information you need to find the right filter for a specific heavy-duty application.

ONLINE PARTS CATALOG:

Find the part number and specification details for any Luber-finer filter.

DISTRIBUTOR LOCATOR:

Enter your zip code and select a mile radius to find nearby distributors.

CROSS REFERENCE:

Enter the part number of another brand's filtration product to obtain a part number and part description for a comparable Luber-finer filter.

PART SEARCH:

Enter a Luber-finer part number to obtain a part description, part dimensions and vehicle compatibility information.
