

# SHIFTING INTO THE LAST MILE

BUILT TO DO MORE®

## THE TIME TO CAPITALIZE ON LAST-MILE DELIVERY IS NOW

Last-mile delivery (the shipment of goods from a retailer's distribution center to a consumer's home) is a rapidly expanding service opportunity for fleet operators.

Fueled by 84% growth within the e-commerce industry in the past five years, last-mile delivery is quickly becoming a key differentiator for many retail operations conducting online sales.

Fleet operators with well-maintained, high-performance light and medium duty vehicles are in a unique position to take advantage of the growing demand for this service.

Because the stop-and-go nature of last-mile delivery can be tough on engines and engine oil, operators need quality filtration solutions that can keep vehicles on the road longer.
