
Subject: PH2867

Design Change:

A manufacturing change has been implemented on the PH2867.

Slight differences can be seen in height and outside diameter as noted.

There is no change in fit or function, and the new design meets all engine application requirements.

The installer will not experience any interference issues with the new design.

Old Design

Outside diameter of old design is
2.66 in.

New Design

Outside diameter of new design is
2.70 in. This increase does not affect
the sealing surface area of the filter.
